

1. Which of the following is used for dressing of wound?
 - a. Betadine ointment
 - b. Betadine lotion
 - c. Hydrogen peroxide
 - d. Soframycin ointment
 - e. All of the above

2. Which of the following is used for wound dressing?
 - a. Gloves
 - b. Gauze pieces
 - c. Gamjee pads
 - d. Dynaplast
 - e. All of the above

3. Which of the following is used for wound dressing?
 - a. Tooth forceps
 - b. Scissors
 - c. Artery forceps
 - d. All of the above.

4. Which of the following is a clean wound?
 - a. Hernia surgery wound
 - b. Appendix surgery wound
 - c. Accident case wound
 - d. None of the above.

5. Which of the following is a clean wound?
 - A. Accident case wound
 - B. Cholecystectomy case wound
 - C. Appendectomy case wound
 - D. Neck femur fracture wound

6. Which of the following is a contaminated wound
 - A. Appendectomy wound
 - B. Cholecystectomy wound
 - C. Open fracture wound
 - D. All of the above

7. What is open fracture?
 - A. Bone is open to exterior
 - B. Skin is intact
 - C. Artery is open
 - D. Vein is open

8. What is first defence of the body?
 - A. Skin
 - B. Fascia
 - C. Muscles
 - D. Bones

9. What is ligament?
 - A. Joins bones to bones
 - B. Joins muscle to muscle
 - C. Joins skin to bones
 - D. Joins muscle to skin

10. How many chambers heart has?
- A. 4
 - B. 5
 - C. 3
 - D. 6
11. How many ribs do we have?
- A. 12
 - B. 24
 - C. 14
 - D. 20
12. Femur bone has the following parts except.
- A. Head
 - B. Neck
 - C. Shaft
 - D. Tail
13. Which of the following is an absorbable suture
- A. Chromic catgut
 - B. Silk
 - C. Ethilon
 - D. Prolene
14. Which of the following is a non absorbable suture?
- A. Chromic catgut
 - B. Vicryl
 - C. Monocryl
 - D. Ethilon
15. What should be used for skin suturing
- A. Taper cut needle
 - B. Round bodied needle
 - C. Both
 - D. None of the above
16. Skin sutures on scalp should be removed on
- A. Day 14
 - B. Day 12
 - C. Day 10
 - D. Day 7
17. Skin sutures on face should be removed on
- A. Day 3
 - B. Day 5
 - C. Day 7
 - D. Day 9
18. Skin sutures on back, torso and limbs are removed on
- A. Day 14
 - B. Day 10
 - C. Day 7
 - D. Day 5

19. Skin is sutured for
- A. Approximation
 - B. Infection prevention
 - C. Early healing
 - D. All of the above
20. Which are types of drain
- A. Abdominal Drain Kit
 - B. Suction Drain kit
 - C. Intercostal Drain kit
 - D. All of the above.
21. Negative suction is used in
- A. Abdominal drain kit
 - B. Suction drain kit
 - C. Intercostal drain kit
 - D. None of the above.
22. Under water seal is used in
- A. Abdominal drain kit
 - B. Suction drain kit.
 - C. Intercostal drain kit
 - D. None of the above
23. What is normal pulse rate of human being
- A. 60-100
 - B. 70-110
 - C. 50-90
 - D. 80-120
24. What is the normal heart rate of human beings
- A. 60-100
 - B. 70-110
 - C. 50-90
 - D. 80-120
25. What is the normal blood pressure of human beings
- A. 120/80mm of Hg
 - B. 140/85mm of Hg
 - C. 140/90mm of Hg
 - D. 130/80mm of Hg
26. Metatarsal bone os found in
- A. Hands
 - B. Legs
 - C. Thigh
 - D. Foot
27. Carpal bones are found in
- A. Hands
 - B. Legs
 - C. Thighs
 - D. Foot

28. Sesamoid bone is
- A. Bone in bone
 - B. Bone in muscle
 - C. Bone in ligament
 - D. Bone in skin
29. Which of the following can lead to burns
- A. Acids
 - B. Alkalis
 - C. Electric current
 - D. Lightening
 - E. All of the above
30. Closed dressing of burns wounds all are used except
- A. Sofratulle
 - B. Banana leaves sterilized
 - C. Silver sulfadiazine
 - D. All of the above
31. Burns can be all except
- A. Superficial thickness
 - B. Deep thickness
 - C. Muscle deep
 - D. Bone deep
 - E. All of the above
32. Burns will lead to loss of _____ from body
- A. Water
 - B. Electrolytes
 - C. Pristine
 - D. All of the above
33. What is the fluid of choice for resuscitation in burns
- A. RL
 - B. NS
 - C. DNS
 - D. DE
34. Burns what should not be applied.
- A. Wax
 - B. Burnol cream
 - C. Soframycin cream
 - D. Silver cream
35. Burns what should not be applied
- A. Colgate
 - B. Chuna
 - C. Cow dung
 - D. Cow urine
 - E. All of the above
36. Burns what should be avoided
- A. Colgate
 - B. Chuna
 - C. Cow dung
 - D. Cow urine
 - E. All of the above

37. What can be applied on burns wounds
- A. Pig skin sterilized
 - B. Human skin sterilized
 - C. Human amnion sterilized
 - D. All of the above
38. Burns can be
- A. Grade 1
 - B. Grade 2
 - C. Grade 3
 - D. Grade 4.
 - E. All of the above
39. Scald burns are caused by
- A. Hot air
 - B. Hot liquids
 - C. Hot rods
 - D. All of the above
40. Tree pattern burns are seen in
- A. Electric burns
 - B. Chemical burns
 - C. Hot water burns
 - D. Hot air burns
41. Magnesium sulphate dressing reduces
- A. Swelling
 - B. Infection
 - C. Both
 - D. None
42. Scrotal bandage is used for
- A. Hydrocele surgery
 - B. Hernia surgery
 - C. Hemorrhoids surgery
 - D. Perineal abscess
43. T bandage is used in
- A. Hydrocele surgery
 - B. Hernia surgery
 - C. Hemorrhoids surgery
 - D. Appendectomy
44. All are used for dressing except
- A. Dynaplast
 - B. Fixomull
 - C. Microwave
 - D. Micro-tape
45. Bandage for the skull is best given by
- A. Micro-tape
 - B. Dynaplast
 - C. Caplin bandage
 - D. All of the above
46. Bandage of the skull is known as
- A. Charlie-Chaplin

- B. Annu-Malik
- C. Caplin
- D. Anup-Jalota

47. Seroma is

- A. Sterile collection of edema fluid
- B. Unsterile collection of edema fluid
- C. Pus collection
- D. Chemical collection

48. Incision and drainage should be done in

- A. Abscess
- B. Abrasion
- C. Contusion
- D. Cinema

49. Nail removal is done in

- A. Operation Theatre
- B. Dressing Room
- C. Consultation room
- D. Casualty

50. Bleeding from wound should be arrested

- A. Immediately
- B. Late
- C. Delayed
- D. Day after tomorrow

51. Dark red colour bleed is from

- A. Artery
- B. Vein
- C. Muscle
- D. Skin

52. Dark brown color bleed is from

- A. Artery
- B. Vein
- C. Muscle
- D. Skin

53. Below knee amputation which bone is cut

- A. Fibula
- B. Tibia
- C. Both
- D. None

54. Below knee amputation which bone is cut

- A. Femur
- B. Tibia-fibula
- C. Ulna
- D. Humerus

55. Above knee amputation which bone is cut

- A. Femur
- B. Tibia
- C. Fibula
- D. Humerus

56. Above elbow amputation which bone is cut

- A. Humerus
- B. Ulna
- C. Radius
- D. Femur

57. Below elbow amputation which bone is cut

- A. Humerus
- B. Ulna-radius
- C. Carpals
- D. Metacarpals

58. All are type of suturing techniques

- A. Simple
- B. Mattress
- C. Roman sandle
- D. Mirchi

59. Now a days what kind of gloves are used

- A. Non powdered
- B. Powdered
- C. Unsterile
- D. Plastic

60. Skin staplers are a type of

- A. Sutures
- B. Dressing
- C. Gauze
- D. Antiseptic

61. All are techniques of sterilization except

- A. Heating
- B. Boiling
- C. Dry heat
- D. ETO

62. Sterilization is done in

- A. Horizontal sterilizer
- B. Vertical sterilization
- C. Gas sterilizer
- D. All of the above

63. What is the active component of betadine lotion?

- A. Povidone Iodine
- B. Spirit
- C. Hydrogen peroxide
- D. Hydro-colloid particles

64. Which of these is put in nose of the patient

- A. Ryles tube
- B. Kehr's T tube
- C. Tracheostomy tube
- D. Folley's catheter

65. What is used to drain urine

- A. Folley's catheter
- B. Ryles tube

- C. Tracheostomy tube
- D. Kehr's T tube

66. What is put inside the abdomen in case of infected case

- A. Abdominal drain tube
- B. Chest drain tube
- C. Foleys catheter
- D. Plain rubber catheter

67. Dangerous area of face is

- A. Tip of nose
- B. Upper lip
- C. Philtrum
- D. All of the above

68. Eusol is made from

- A. Spirit
- B. Hydrogen peroxide
- C. Boric acid
- D. Bernadine

69. Off loading is useful in

- A. Diabetic foot ulcers
- B. Cellulitis
- C. Necrotizing fascitis
- D. Perforation peritonitis

70. What is the long form of CMS

- A. Chief Medical Superintendent
- B. Chief Medical SupSupervis
- C. Chief Material superintendent
- D. Chief Material Supervisor

71. What is the name of DRM Nagpur

- A. Shri Somesh Kumar
- B. Shri Brijesh Kumar
- C. Shri Brajesh Dixit
- D. Shri Om Kapoor

72. What is the full form of ARME

- A. Accident Relief Medical Equipment
- B. Accident Response Medical Ethics
- C. Accident Relief Material Equipment
- D. Accident Related Medical Equipment

73. How frequently Mock ARME drill is to be conducted

- A. 3 months
- B. 6 months
- C. 9months
- D. 12months

74. At which serial number of hooter ARME is moved from home station

- A. 3
- B. 4
- C. 5
- D. 1

75. ARME gets precedence over

- A. Rajdhani Express
- B. Durgam Express
- C. Shatabdi Express
- D. All of the above

76. Spinal Anaesthesia is given in

- A. Spinal.cord
- B. Legs
- C. Thighs
- D. Hands

77. Local anaesthesia is used for

- A. Nail removal
- B. Appendectomy
- C. Hernia surgery
- D. Heart Surgery

78. Local Anaesthesia uses

- A. Xylocaine
- B. Sensorcaine
- C. Nitrous oxide
- D. Halothane

79. LSCS is

- A. Lower segment Cesarean Section
- B. Length shoulder Central Scheme
- C. Long Short Central Sangh
- D. Let's See Chill Scheme

80. Hysterectomy refers to

- A. Removal of gall bladder
- B. Removal of Uterus
- C. Removal of appendix
- D. Removal of hydrocele

81. Shaving of hairs is done

- A. Before surgery
- B. After surgery
- C. During surgery
- D. None of the above

82. Thomas splint is given for

- A. Fracture of skull
- B. Fracture of arm bone
- C. Fracture of spine
- D. Fracture of thigh bone

83. What is simple injury

- A. Abrasion
- B. Fracture
- C. Loss of vision
- D. Loss of hearing

84. Serious injury is

- A. Abrasion
- B. Contusion

- C. Fracture
- D. Incised wound

85. Sterilization is
- A. Killing patient
 - B. Killing doctor
 - C. Killing germs
 - D. Burning clothes

86. Which of the following is IV fluid
- A. NS
 - B. DNS
 - C. RL
 - D. D5
 - E. All of the above

87. As the size of the folley's catheter increases
- A. Diameter of catheter increases
 - B. Length of catheter increases
 - C. Drainage of catheter increases
 - D. Volume of catheter increases

88. As the guage of needle increases
- A. Diameter increases
 - B. Length increases
 - C. Volume increases
 - D. IV set increases

89. In case of dog bite wound is
- A. Sutured
 - B. Not sutured
 - C. Sterilised
 - D. Oiled

90. In case of dog bite
- A. Wound is dressed
 - B. Wound is not dressed
 - C. Wound is sutured
 - D. Wound is closed

91. Pressure dressing is given for
- A. Preventing bleeding
 - B. Preventing infection
 - C. Preventing hernia
 - D. Preventing hydrocele

92. Cidex is
- A. Insecticide
 - B. Pesticide
 - C. Adhesive tape
 - D. Drug
 - E. Sterilising agent

93. What is used to measure BP
- A. Spymomanometer
 - B. Stethoscope
 - C. Endoscope

D. Laparoscope

94. What is used to listen to heart beat

- A. Sphygmomanometer
- B. Stethoscope
- C. Endoscope
- D. Laparoscope

95. What is used to suture the skin

- A. Absorbable suture
- B. Non Absorbable suture
- C. Both
- D. None

96. How do we support the neck of a trauma patient

- A. Neck holding by hands
- B. Neck holding by collar
- C. Neck holding by Philadelphia collar
- D. Neck holding by splint

97. What is RISE

- A. Rest, Immobilization, Support, Elevation
- B. Rest, Imagine, Sacrifice, Elongate
- C. Roaming, International calling, SMS, Email
- D. Reassure, Immolate, Select, Eliminate

98. What is healing by secondary intention

- A. Healing by taking sutures
- B. Healing by natural course
- C. Healing after primary easier fails
- D. Healing by magic

99. What is Hyperbaric Oxygen treatment useful for

- A. Head Injuries
- B. Burns
- C. Badly infected wounds
- D. All of the above

100. What is VAC dressing

- A. Vaccine dressing
- B. Vacuum Assisted Closure dressing
- C. Vacutanier dressing
- D. Varicose air conditioned dressing.
